TIRANA 2026

1. Evaluation of the team members

(Please evaluate with grades the work done by your team members, and a short description of what they did.)

No	Name	*Team effort	*Time management	*General grading	Description
1	Xhoi	10	10	10	TEAM LEADER Frontend developer. Built the React architecture, admin and professor dashboards, and client-side routing.
2	Loric	10	10	10	AI Agent developer. Integrated the M.I.A chat assistant using Groq and Gemini APIs, handled prompt engineering, and implemented persistent student preference memory.
3	Parashqevi	10	10	10	Backend developer. Handled API routing, authentication middleware, data queries, and Supabase integration.
4	Aida	10	10	10	Backend developer. Designed and implemented FastAPI endpoints, database models, business logic, and validation layer.

(Explanation: * The grading given is from 1-10)

2. Comments about the work done by other members

Xhoi served as team leader and frontend developer. She coordinated the project, built the React architecture, and delivered the admin and professor dashboards with a clear component structure that made collaboration straightforward. Loric did excellent work on the M.I.A. AI agent, setting up the Groq and Gemini API connections, engineering the prompts, and implementing persistent memory of student preferences. Aida built the backend foundation with solid FastAPI endpoints, clean database models, and thorough validation; her code was well-structured and easy to build on. Parashqevi handled authentication, middleware, and Supabase integration professionally, keeping the backend secure and the data layer stable throughout development.

3. Work done by me

I was responsible for the student dashboard UI and the M.I.A chat interface. My work included designing and implementing all student-facing pages in React: the grades view, GPA display, attendance tracker, transcript page, assignments section, and the finance tab. I applied Tailwind CSS throughout to ensure a consistent and responsive layout across all screen sizes.
