

MEETING REPORT

Team Name: G3

Date of Meeting: May 17, 2026

Start Time: 2:00 PM

End Time: 3:00 PM

Meeting Location: WhatsApp

Other Members Present: Ajna Nushi, Parashqevi Klimi, Aida Bedaj, Loric Hagard

Members Absent: None

Topics Discussed:

- 1. Data integrity, grade editing, and student views (Xhoi):** Fixed a silent overwrite bug in attendance — backend now returns 409 if a week is already recorded and the Save Session button is disabled until cleared. Added a `PUT /professor/grades/{grade_id}` endpoint with an inline edit mode on the professor dashboard. On the student side, replaced the flat grades table with a two-level course drilldown and rebuilt the transcript tab to show grades grouped by semester with per-semester and cumulative averages.
- 2. Frontend finalization (Ajna):** Completed remaining UI polish across all three dashboards and conducted a final visual consistency review. Minor layout issues were resolved and the frontend was confirmed stable for integration testing.
- 3. Backend finalization and API documentation (Aida & Parashqevi):** Finalized backend cleanup and confirmed all endpoints are stable. Initial API documentation covering endpoint signatures, payloads, and responses was drafted to support end-to-end testing.
- 4. AI chatbot — chat history session (Loric):** Completed and tested the chat history session feature, enabling the chatbot to retain context within a user session. Shared an overview of the chatbot's full response logic with the team.

Decisions Made:

All major feature development is complete. The team will focus entirely on end-to-end integration testing and submission preparation. No new features will be introduced.

Tasks Assigned:

Xhoi was assigned to verify grade and attendance endpoints under edge cases and ensure student-facing views are stable. Ajna was asked to do a final cross-device compatibility check. Aida and Parashqevi were tasked with completing and sharing the API documentation. Loric was assigned to finalize chatbot documentation and confirm integration with the student portal.

Time, Place, and Agenda for Next Meeting:

Time/Location: Not specified **Agenda:** Full end-to-end integration testing and preparation of project submission deliverables.
