

MEETING REPORT

Team Name: Group 3

Date of Meeting: June 5, 2026

Start Time: 2:00 PM

End Time: 3:00 PM

Meeting Location: WhatsApp Call (All Members)

Members Present: Xhoi Ikonomi, Ajna Nushi, Parashqevi Klimi, Aida Bedaj, Loric Hagard

Members Absent: None

Topics Discussed:

1. **Final Review & Debugging:** Prior to final submission, the team thoroughly examined the entire application, finding and resolving any lingering issues. Each member gave a status report on their designated area.
2. **Diagrams and Final Report:** To make sure the final written report appropriately represents the finished project, the team examined the structure and content of the final report as well as the technical diagrams created for the final submission.
3. **Repository Structure:** All files, folders, and documentation in the GitHub repository were examined to make sure they were tidy, uniform, and prepared for submission.
4. **Final Submission Checklist:** The team decided to confirm that all deliverables were finished for final submission and presentation on June 8.

Decisions Made:

- The project is ready for final submission, scheduled for June 6, 2026.
- All outstanding bugs have been addressed, and the codebase is considered stable.
- The final report has been reviewed and approved by the team.
- No further meeting will be scheduled, as this is the final week of the project.

Tasks Assigned:

- **Xhoi Ikonomi** was responsible for reviewing and fixing some bugs in the entire application, as well as creating some technical diagrams for the final submission, drafting the final report, and reviewing the overall repository structure to ensure that it was ready for submission.
- **Ajna Nushi** was responsible for the creation of additional technical diagrams, the compilation and finalization of the final report, and the completion of a final review of the report's content.
- **Parashqevi Klimi** was responsible for finishing the final documentation and reports, conducting a review of the backend components, and contributing to the preparation of the final submission.
- **Loric Hagard** was responsible for locating and fixing bugs in the automated intelligence agent's code, as well as verifying the agent's functionality and stability prior to its final submission.
- **Aida Bedaj** carried out testing across the entire application to ensure that it was correct and stable before the application was submitted in its final form.
